

DIVERSE | RELIABLE | ON TIME

Our Mission is Simple.

For over 35 years Bosnar Engineering has provided engineering solutions both nationally and internationally servicing the mining, bearing and general construction industries.

This family owned and run business is operated by brothers Larry & Eddie Bosnar with an impressive purpose built 3500m² workshop on a 11700 sqm block in Wangara. The workshop includes approximately 4000m² undercover including two storey office space of 400m², comprising of three bays each with 10 tonne overhead gantry cranes with 7.5m under hook, 20 tonne overhead gantry crane and 500m² of warehouse space. Employing over 20 staff the business continues to grow with an extensive customer base.

Bosnar Engineering has the ability to take on any job no matter how big or small.

Milling

Manual – 4 machines with ranges up to 1500 x 500mm x 800mm high
CNC Vertical machine centres with ranges up to 800 x 400 x 500mm high
Double pallet horizontal machine centres with ranges up to 1025 x 800 x 750mm high
5 Axis Machining Centre with ranges up to 1400 x 710 x 610mm
Double column machining centres with ranges up to 5000 x 2800 x 1950mm
Bedmill – 1 machine with range of 8000 x 1000 x 1000

Turning

Manual – 8 machines up to 1150mm swing 4300mm between centres
CNC – 8 machines – 2 axis up to 5 axis ranging up to 1000mm swing, 3000mm between centres
Integrex 60 – 915mm turning with 4220mm between centres
Vertical Lathe – 5 machines with ranges up to 4200mm diameter and 2000mm high

General

Horizontal Borer – 2 machines with ranges up to 3000mm travel, 2000mm x 2500mm high
Surface Grinding up to 1200 x 500 x 500mm
180T Hydraulic Press
Slotting up to 500mm stroke, 800mm rotary table
Hydraulic Roller (Plate bending machine) 1200mm with 36-450mm diameter
Oxy and Plasma Cutting
Temperature Controlled Inspection room with Faro equipment
